

Prerequisite Information

The Lee University MBA program does not require a specific undergraduate major for admission. However, there are eight prerequisite courses that must be completed prior to enrollment for students without prior academic credit for:

- Principles of Accounting 1 & 2
- Statistics
- Corporate Finance
- Macroeconomics
- Microeconomics
- Management
- Marketing

We offer several ways to satisfy these prerequisites including traditional courses, online courses, self-directed online modules, or any combination of these options.

Option 1: Lee University Undergraduate Courses

All of the prerequisite courses can be fulfilled through the successful completion of traditional, on-campus courses. In order to enroll in these courses, you must separately apply to Lee University as an undergraduate student. The tuition for these courses is paid per credit hour unless you are a full-time student (12 or more credit hours in one semester). Each prerequisite course is 3 credit hours.

Option 2: Lee University Division of Adult Learning Online Courses

We partnered with the Lee University Division of Adult Learning (DAL) to develop online leveling courses. These are designed so that you can complete all of the prerequisites in only four courses which are offered in 8 week sessions. The DAL typically offers two of these courses each session. The tuition for these courses is paid per credit hour at a reduced rate from on-campus courses. Each prerequisite course is 3 credit hours. *This is the recommended option for most students.*

Option 3: Peregrine Self-Directed Online Modules

The third option is to complete a series of self-directed online modules available through Peregrine Academic Services. These modules allow you to work at your own pace, but without the assistance of an instructor. All coursework, including the pretest and posttest must be completed to satisfy the prerequisite. The cost per module is \$35 and is paid directly to Peregrine. Please contact the Office of Graduate Studies in Business for more information about these options including how to register.

Please see reverse side for more information.

Comparison of Prerequisite Options

	Option 1	Option 2	Option 3
Prerequisite	Lee University Undergraduate	DAL Online	Peregrine Modules
Accounting I	ACCT 241 Principles of Accounting I	BUSN 400 Foundations of Accounting	Module 1 Foundations of Accounting
